

- The intelligence continues to be developed within the area with the intention of further police activity.
- Vehicles have been identified via specialist vehicle examiners, with work ongoing to understand the organised vehicle crime.
- Chief Inspector Cooper and Inspector Main patrolled Navestock and were given a tour to properly learn and understand where the issues are. A meeting is taking place with Keeping Britain Tidy to see what other initiatives there might be to help us tackle ASB.
- A designated Brentwood Rural Engagement Officer has started. He will be working alongside officers and partner agencies to tackle ongoing issues, attend engagement events and provide crime prevention advice. Rural Engagement Team provided a short training input to Community Policing Officers, teaching subjects including dealing with wildlife crime / encampments.
- Between 15/12/2023 and 15/01/2024 we have had a total of **5** calls to Essex Police for the area. These were 4 calls for stray horses (horseman side) and 1 call to a party (ASB).
- You can sign up to our weekly newsletter, which is a free service sent straight to your email. You can unsubscribe at any time. The newsletters contain the latest new stories, upcoming engagement events, and crime prevention advice. Update from Enforcement

In December, 19 hours of daily patrols took place in Navestock. There were also 3 out of hours patrols and 2 with the Rural Policing Team. National Enforcement Solutions also carried out patrols in Navestock investigating fly tips. Although no fines have been issued, 2 cautionary questionnaires have been sent out and these may result in FPN's.

During January, 11 patrols and 2 out of hour patrols have taken place in Navestock. 1 joint patrol with Environmental Health to a site who was burning waste, this is currently being dealt with by David Carter's team. (Environmental Health).

We have collected video evidence from our CCTV cameras of two incidences of crime including one stolen agricultural vehicle which was passed to the Police. NES have carried out 133 investigations and 2 FPN's have been issued. These are borough wide as they have had issues with a new software program. Once individual ward information is received a further update for Navestock will be provided.

From the mast perspective, the base for Muthering is going in this week. The mast is being delivered at the end of the month and the kit should be able to be mounted on this at the same time. These will be ANPR number plates for vehicle detection, with temporary protection cameras.

Plans are in hand for the next two concrete bases to be ready in March and the columns to follow by the end of March/middle of April.

Fly Tip Data		
	December, 2023	January, 2024
Whole Borough (Reported)	62	126
Navestock (Reported)	14	25
